

Price list SPITA ResQ-spray 2022

SPITA ResQ-spray can permanently protect metal objects, electrical and electronic devices, machinery and equipment against damage and corrosion up to one year after application. Conventional contact sprays and creep oils emulsify and dissolve in water, which leads to incomplete and only short-term protection from moisture.

SPITA ResQ-spray, on the other hand, does not emulsify, but forms a highly creep-resistant protective film and submerges any moisture. It even works afterwards, when the object is already contaminated with moisture, by penetrating the moisture on its way to the metal surface.

SPITA ResQ-spray impresses with its extremely high water displacement, its outstanding creeping ability and its long-lasting effect. In addition, the conductivity of the treated parts is retained by the high dielectric strength and the high surface resistance.

Therefore **SPITA ResQ-spray** cannot be compared with any other product!

The service life of the treated parts is prolonged and the functional reliability of electrical equipment, machines and components is increased.

SPITA ResQ-spray doesn't attack other common materials where it is applied on.

SPITA ResQ-spray is RoHS compliant as it doesn't contain any hazardous substance!

ATTENTION: sign for "highly inflammable" on the can?

Due to the environmentally friendly propane gas 'propane-butane' as a carrier material, **SPITA ResQ-spray** is combustible. If it is sprayed, however, there is no danger after about 5 minutes. This not only protects the environment, but also ensures an even distribution of the active ingredients.
